The Steel Supply Company is a distributor of products purchased from various domestic mills. All of these suppliers have been requested to address the California Proposition 65 regulation also known as "Safe Drinking Water and Toxic Enforcement Act of 1986."

Conclusions:

*None of the Prop 65 listed chemicals are present as by-products.

*Prop 65 listed chemicals that may be present as trace impurities would not be expected to cause exceedance of the No Significant Risk Levels for Carcinogens or Maximum Allowable Dose Levels for Chemicals Causing Reproductive Toxicity. Actual "Safe-Harbor" levels would need to be calculated by the importer of the product into the State of California.

Please note that this response is for use as information only. The Steel Supply Company does not accept responsibility for customer compliance with the California Proposition 65 regulation.
